

Edison Energy provides independent, global advisory solutions to help large corporate, industrial, and institutional clients better understand and navigate the choices and risks of managing energy. Through an integrated portfolio approach, Edison Energy enables decision-makers in organizations to deliver on their strategic, financial and sustainability goals.

Providing a suite of specialized services across analytics, renewables & sustainability, supply, and demand, Edison Energy addresses the three biggest challenges in energy today: **cost**, **carbon**, and **complex choices**.

## What We Do

---

**Transform** the way clients optimize their energy use and execute sustainable long-term solutions.

**Empower** clients to conquer the biggest challenges in energy today: cost, carbon, and complex choices.

**Deliver** custom, insight-based, and data-driven integrated energy portfolio solutions.

## Our Difference

---

Data + Commercial Expertise = Valuable Insights

Transparently Independent

Human Approach to Complex Challenges

Passion for Creating Impact

# Our Service Lines

## ● Sustainability & Portfolio Advisory

- Strategic Planning and Goal Setting
- Integrated Sustainability Strategy
- Carbon Neutrality
- Science Based Target Development
- Energy Attribute Certificate & Carbon Offset Management
- Supply Chain Support & Program Development

## ● Energy Optimization

- ASHRAE Level Energy Audits (I, II, III)
- Building and System Intelligence
- Energy Master Planning
- Distributed Energy Resources & Storage Solutions
- Commissioning (New & Existing)
- VEM® Fault Detection & Diagnostics
- Project Management and Implementation
- Innovative Financing Solutions

## ● Renewable Advisory

- Strategy and Goal Setting
- Physical and Virtual PPA Procurement and Ownership
- Reporting and Communications
- Aggregations of Buyers
- PPA Management and Optimization

## ● Supply Solutions

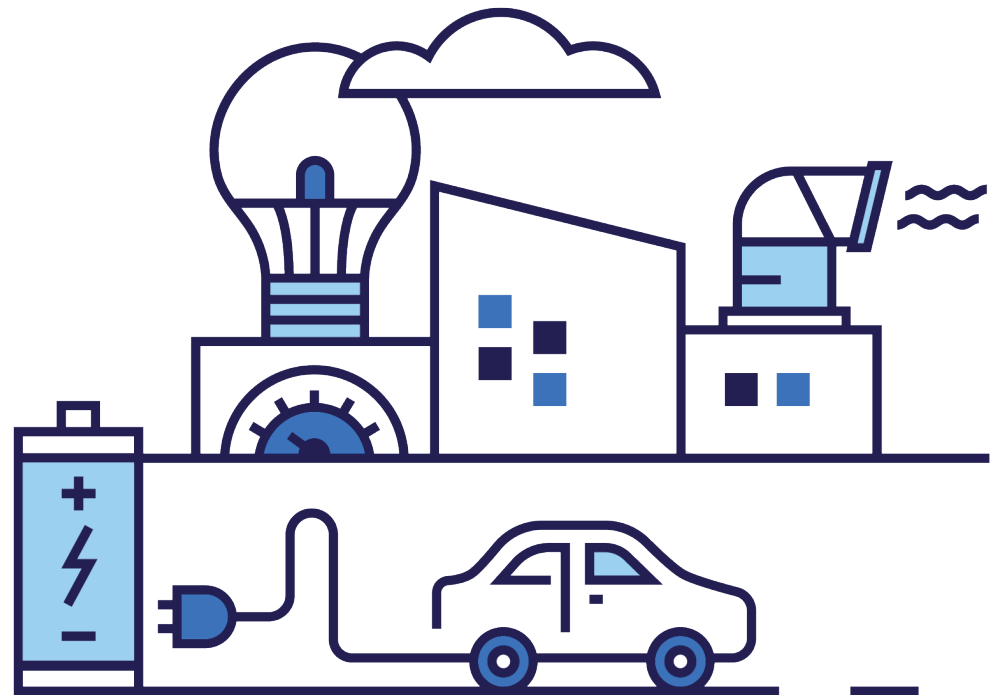

- Strategic Supply Program Development
- Supply Advisory and Procurement (Natural Gas and Power)
- Data Management and Invoice Solutions

# Distributed Energy Resources (DER)

Advising on and implementing complex energy efficiency and conservation projects. Leveraging technology and years of engineering expertise, we implement tailored and pragmatic energy programs.

DER Solutions provide resiliency, economic certainty, and reduce carbon emissions. DER Solutions we offer include:

- Combined Heat and Power (CHP)
- Biogas Generation, Capture and Utilization
- Battery Storage
- Thermal Energy Storage
- Electrical Vehicle Charging
- Solar PV (Onsite, Community)
- Backup/Peak Shaving Electrical Generation

# Edison By the Numbers

---

**\$5B+**

In energy spend managed

**600M+**

Sq. ft. of facilities optimized through energy efficiency projects

**5.5+**

Gigawatts of offsite renewables procurement

**600+**

Megawatts of DER and community solar projects\*

\*Advisory and implementation oversight

**Fortune 300**
