

ADVISORY SERVICES

What it is

Constant shifts in the energy market have created a fluid industry that thrives on innovation and the ability to adapt quickly to challenges. A partnership with NRG delivers proven solutions, market experience, and customized services that enhance your energy strategy and your overall understanding of how your business is using energy today — and how it could save on energy use in the future.

How it works

OUR SERVICES HIGHLIGHT YOUR STRENGTHS

With services tailored to your business, we can identify areas where your energy strategy can excel. Our team will analyze your challenges and needs and develop a strategy that improves performance and drives productivity.

OUR SOLUTIONS HELP YOU INNOVATE

Exploring a new energy solution is a good way to get ahead of the curve. Our suite of solutions keeps your strategy fresh and up to date. In doing so, your business will utilize all of the latest technologies and energy approaches and operate more efficiently.

OUR TOOLS GIVE YOU VALUABLE INSIGHT

The more you know about your business, the better you can improve performance. Our digital tools provide detailed knowledge of how your business uses energy, which processes could bring added efficiency, and how energy could be better managed moving forward.

SERVICES

Electricity & Natural Gas Supply

Utility Bill Management

Sustainability Management

Energy Efficiency

Renewables

Energy that works for you

We foster a collaborative culture — one that shares vital industry knowledge and the latest technologies all across our organization. As a result, we are able to bring together resources to provide you with a tailored energy strategy that is more cost-effective, resilient, sustainable, and efficient.

Our suite of services

ELECTRICITY & NATURAL GAS SUPPLY

Create a better strategy for lowering what you spend on energy. We bring an open mind and an extensive energy background, helping you make informed decisions relating to contract terms, product types, energy sources, and potential usage variances.

UTILITY BILL MANAGEMENT

Streamline bills for easier payments and aggregate data into usable reports. We offer a wealth of bill management experience, and the expertise of a third-party processor, so we can quickly spot trends, inefficiencies, and billing errors.

SUSTAINABILITY MANAGEMENT

Identify and implement affordable, measurable, and sustainable solutions. Our capability as a sustainability advisor transcends energy. We provide expert support in sustainability reporting. This includes GRI, climate-related financial reporting and scenario planning using TCFD, carbon emissions accounting and management, and material resources and waste management.

ENERGY EFFICIENCY

Assess your usage and tailor a comprehensive solution that attains your goals. We approach efficiency with a true commitment to fully understand your organization's energy usage. This leads to recommended energy conservation measures that are backed by reliable data.

RENEWABLES

Identify your goals, logistics, and usage. Our approach focuses on your business first, then matches your needs, goals, and logistics to the right solution — community solar partnerships, virtual PPAs, and renewably sourced electricity plans.

BENEFITS

Cost-effectiveness:

- Spend less on energy and more on your long-term goals

Resiliency:

- Maintain a dependable energy supply when it matters most

Sustainability:

- Explore adding sustainable energy options into your strategy

Efficiency:

- Use less energy to do more with an efficient approach
