

SUSTAINABILITY
MANAGEMENT

What it is

Our team's expertise helps customers discover and implement attainable, affordable, and most of all sustainable energy solutions for their businesses. We'll work with you to assess your sustainability challenges and goals so we can deliver a solution that transforms your business with measurable results.

How it works

OPTIMIZED ENERGY SUPPLY

We'll help you navigate the rapidly evolving clean energy landscape with sustainable management solutions tailored to your energy market, budget, and emissions goals that improve your business performance.

SUSTAINABILITY MANAGEMENT

We'll develop a practical strategy that helps your business grow, mitigate risk, enhance brand identity, and show value to investors and customers while simplifying the navigation of rating and reporting protocols.

DEMAND-SIDE SOLUTIONS

We'll help you cut costs and add resilience to your business with flexible, robust demand-side solutions backed by reliable power assessments.

SUSTAINABILITY IN BUSINESS IMPORTANT AND EVOLVING

\$298 B

global building efficiency market
size in 2019 – **Advanced Energy Economy**

57%

of companies said they plan
to increase expenditure on
sustainability – **HSBC Navigator**

200+

industrial companies pledged
25% reduction in energy intensity
in 10 years – **U.S. Department of Energy**

Let's get started.

How your business benefits

Sustainability is a worthy goal that helps keep the environment — and your business — front of mind. Here are the specific steps we implement to make it a reality.

OPTIMIZED ENERGY SUPPLY

- Supply assessment
- Renewable energy procurement
- Greenhouse gas emissions baselining
- Reliability services

SUSTAINABILITY MANAGEMENT

- Greenhouse gas inventory
- Materiality assessment
- CDP disclosure (environmental impact)
- Global Reporting Initiative (GRI)
- Sustainability Accounting Standards Board
- Science Based Targets initiative
- Task Force on Climate-related Financial Disclosures
- Leadership in Energy and Environmental Design certification
- Climate action planning

DEMAND-SIDE SOLUTIONS

- Energy efficiency
- Asset-backed demand response
- Energy resilience planning
- Retro-commissioning
- Energy management

OUTCOMES AND INNOVATIONS

ENHANCED SUSTAINABILITY

Meet your environmental and economic goals with clean renewable energy.

IMPROVED STABILITY

Level out your energy spend and gain greater control.

TAILORED SOLUTION

Receive customized advice based on your energy usage and goals.
